CRITICAL

## COMPLIANCE SNAPSHOT

|                |    |
|----------------|----|
| Total Controls | 44 |
| Compliant      | 6  |
| Non-Compliant  | 21 |
| Not Assessed   | 17 |

## Top Findings

| Control | Risk     | Finding                                                        | Remediation                                                     |
|---------|----------|----------------------------------------------------------------|-----------------------------------------------------------------|
| PA-02   | CRITICAL | Observed value 'None' does not meet expected baseline '0'.     | Apply security patches to address reported CVEs.                |
| PA-16   | CRITICAL | Observed value '4' does not meet expected baseline '0'.        | Remove Any-Any rules or apply strict security profiles.         |
| PA-24   | CRITICAL | Observed value 'False' does not meet expected baseline 'True'. | Enable Threat Prevention and apply profiles to all allow rules. |
| PA-26   | CRITICAL | Observed value 'False' does not meet expected baseline 'True'. | Enable DNS sinkhole for Anti-Spyware protection.                |
| PA-31   | CRITICAL | Observed value 'False' does not meet expected baseline 'True'. | Implement SSL decryption policy.                                |

## Remediation Priorities

|   |                                                                 |
|---|-----------------------------------------------------------------|
| 1 | Apply security patches to address reported CVEs.                |
| 2 | Remove Any-Any rules or apply strict security profiles.         |
| 3 | Enable Threat Prevention and apply profiles to all allow rules. |
| 4 | Enable DNS sinkhole for Anti-Spyware protection.                |
| 5 | Implement SSL decryption policy.                                |
